# The future of care coordination is *now.*

## Introducing the Ultimate Healthcare Management Solution

Imagine a state-of-the-art healthcare coordination platform that combines the best features of social networking *plus* 20 years of medical software expertise. The result? Highly accessible health information, delivered with maximum levels of privacy, security and ease-of-use.

**myHEALTHware**® (MHW) is the ultimate coordinated care solution, delivering the tools and resources you need to view patient data, connect with fellow healthcare professionals, coordinate with internal and external team members, communicate with other software users and much more. The MHW system serves as a *Health Information Service Provider* (HISP), allowing users to connect and share files with other providers via the open-standard, HIPAA-compliant Direct Protocol, regardless of which EHR they use. **myHEALTHware**® also allows patients to easily manage their health information, providing secure access to medical records, a safe portal for sharing information with family, and reliable messaging with everyone in their medical network.

Are you ready to take your care coordination to the next level? Discover all the ways **myHEALTHware**® can help you begin collaborating, connecting, and communicating today.

**myHEALTHware**® **is a robust, feature-rich platform that allows healthcare providers to:**

USE BLUE BUTTON TECHNOLOGY TO DOWNLOAD OR EXPORT PATIENT INFORMATION THROUGH A HIPAA SECURE METHOD

EXPERIENCE FEWER TELEPHONE INTERRUPTIONS AND REDUCE THE COSTS OF LABOR-INTENSIVE MANUAL FAXING

FULFILL MEANINGFUL USE 2014 STAGE I AND II

REPORT TO HEALTH INFORMATION EXCHANGES, STATE REGISTRIES AND ACCOUNTABLE CARE ORGANIZATIONS

VIEW YOUR PATIENTS' ADVANCE DIRECTIVES, PROBLEMS, MEDICATIONS, IMMUNIZATIONS, FAMILY HISTORY AND MORE

PROMOTE AND STORE PATIENT PRE-VISIT FORMS

SECURELY MESSAGE AND COORDINATE CARE PLANS WITH PATIENTS, INTERNAL STAFF AND EXTERNAL TEAM MEMBERS

SHARE AND STORE INFORMATION ON A SECURE, HIPAA-COMPLIANT PUBLIC CLOUD SYSTEM

KEEP PATIENT DEMOGRAPHICS AND CLINICAL INFORMATION IN SYNC WITH AN EMR SYSTEM
